English - C2, native
Dutch - B1
French - B1
German / Yiddish - A1

EDUCATION

Master of Arts
Bachelor of Arts
Professional Certificates:
Google UX Design
IBM DevOps & Software Engineering
IBM Front-End Software Development

CURRICULUM VITAE

Product design for complex, high-stakes systems.

Accessible, intuitive UX for healthcare, learning, public service, and product teams.

PROFILE

UX leader with 9+ years designing products for healthcare, learning, workforce integration, gaming, and international markets. I turn messy systems into clear, humane product experiences that people can trust when the stakes are high.

SELECTED IMPACT

25+ unique products developed across multiple industries.
12,000+ newcomers supported through workforce integration pathways.

1,000+ medical professionals supported through redesigned education platforms.
Clinical examination time reduced from about 6 minutes to about 2.

WORK EXPERIENCE

2026

Senior Product Designer (UX & Web)

Soul Atlas | Dublin, Ireland

- Translate high-level creative direction into scalable, production-ready web and app experiences aligned with brand vision and user needs.
- Partner with creative, product, and engineering teams to deliver cohesive digital products from concept through launch.
- Design intuitive user flows, wireframes, and high-fidelity interfaces that improve usability, engagement, and visual consistency.
- Apply and evolve design systems and style guides to maintain quality across platforms.

2023 - 2025

Senior Product Designer (UX)

Threshold Training Associates | Prague, CZ

- Led end-to-end design of scalable digital learning products across enterprise sectors including banking and energy.
- Turned complex workflows into intuitive user journeys, reducing task completion time by roughly 25%.
- Partnered with engineering and product in agile sprints to ship features faster and improve delivery velocity.
- Established reusable design patterns that improved consistency across products.

2018 - 2024

Product Designer (UX), Medical Education Platforms

Dalhousie University, Dept. of Medicine | Halifax, Canada

- Redesigned core education platforms used by 1,000+ medical professionals, improving usability scores by roughly 35%.
- Led user research with clinicians and translated findings into product decisions and roadmap priorities.
- Re-architected information systems to support complex learning workflows and increase completion rates.
- Helped stakeholders adopt user-centered design as part of broader digital transformation work.

CURRICULUM VITAE

Product design for complex, high-stakes systems.

Product design, UX research, systems thinking, and calm execution under pressure.

WORK EXPERIENCE (CONT.)

2022 - 2023

Lead Product Designer (UX), Newcomer Integration Platform

Immigration Services Association of Nova Scotia | Canada

- Led UX for a national digital platform supporting workforce integration across Canada.
- Designed end-to-end user journeys that improved job-readiness outcomes for 12,000+ users.
- Translated complex government and employment systems into accessible product experiences.
- Collaborated with cross-functional teams to deliver scalable, user-centered solutions.

2018 - 2022

Lead UX Designer (MedTech / EdTech Products)

Tobenstein Technologies | East Asia / Canada

- Directed UX for multiple digital products across healthcare and education markets.
- Reduced usability friction by roughly 40% through iterative prototyping and testing.
- Built scalable design frameworks to support multi-product ecosystems.
- Delivered data-informed design improvements that increased user satisfaction and retention.

2017 - 2018

UX Designer

KNOX Academy | South Korea

- Designed responsive product experiences for an eLearning platform used by 1,000+ users.
- Improved navigation and information architecture, increasing user engagement.
- Conducted usability testing to inform product iterations.

2010 - 2014

Operations Lead, Emergency Response and Communications

Paladin Security & Emergency Response | Canada

- Led real-time emergency response operations across a major metropolitan hospital network.
- Managed incident communications and decision-making systems in high-pressure, time-critical environments.
- Applied crisis intervention principles to de-escalate complex situations and strengthen human-centered thinking under stress.
- Designed and refined operational protocols, improving consistency and response effectiveness across shifts.
