REFERENCE

Available upon request.

PROFILE

I have nine years of experience in UX design and Learning & Education development in Canada, South Korea, the EU, and East Asia. I excel at taking complex information sets and simplifying them into palatable, bite-sized pieces.

I enjoy being part of the entire development lifecycle, from initial research through design & development, and CI/CD.

My former career was as a first responder in major metropolitan hospitals; I have crisis and non-crisis intervention training, so I excel under pressure.

WORK EXPERIENCE

Senior UX Designer, Learning & Education 2023 - 2025
Threshold Training Associates | Prague, CZ

- Developed client-centred training programs for skills-based development in business, energy, banking, and more.
- Worked with stakeholders to plan, develop, and conduct research projects (typically UX, but also experimental learning methods).

Education & Learning Designer, S.E.T.A 2018 - 2024
Dalhousie University, Dept. of Medicine | Halifax, Canada

- Developed and delivered trauma workshops for nurses, general practitioners, medical students.
- Engaged with stakeholders & synthesised research data to update/improve deliverables.
- Provided consultations for modernising curricula and UX.

Lead UX, Education & Learning Designer (Medtech) 2018 - 2024
Tobenstein Technologies | East Asia / Canada

- Developed medical learning & development software and learning strategies for 80+ international clients.
- Developed proprietary UI for L&D programs.
- Synthesised research and streamlined delivery based on stakeholder feedback

Lead UX & Learning Designer, International Education 2022 - 2023
Immigration Services Association of Nova Scotia | Canada

- Designed and developed eLearning programs/software designed to help integrate newcomers into the Canadian job market.
- Synthesised research data to improve and streamline content for digital delivery via proprietary UXI.

Junior UX Designer, Education & Learning 2017 - 2018
KNOX Academy | South Korea

- Designed proprietary eLearning software for ESL students.
- Developed and conducted user research projects for eLearning apps.
